

MUHAMMAD TAHIR SAEED

JUNIOR AI/ML ENGINEER | MACHINE LEARNING & NLP

Lahore, Pakistan | tahirsaeed33@gmail.com | +92 333 846 7000 |

linkedin.com/in/tahir-saeed | github.com/tahirsaeedtech-stack

PROFESSIONAL SUMMARY

Junior AI/ML Engineer with hands-on portfolio work in NLP, regression, and classification, backed by 10+ years of front-end and software engineering experience. Builds end-to-end AI applications with Python, FastAPI, React, and Docker, including semantic resume matching and explainable price prediction. Combines model evaluation and cloud deployment experience with a record of delivering web applications for global clients.

CORE SKILLS

Machine Learning & NLP: Python | NumPy | Pandas | scikit-learn | CatBoost | SHAP | Sentence Transformers | Semantic Matching | Model Evaluation | Data Preprocessing

Application Development: FastAPI | REST APIs | React.js | Vite | Next.js | JavaScript (ES6+) | HTML5 | CSS3 | Tailwind CSS | SQL Fundamentals

Cloud & Engineering: Docker | GCP (Google Cloud Run) | Vercel | Git | GitHub | GitHub Actions (CI/CD) | Automated Testing | React Testing Library | Agile/Scrum

AI AND MACHINE LEARNING EXPERIENCE

AI/ML Engineer – Independent Projects | August 2026 – Present

Resume-Job Match Analyzer | NLP and Semantic Matching

GitHub: <https://github.com/tahirsaeedtech-stack/resume-job-match-analyzer> | Live demo: <https://resume-job-match-analyzer-liart.vercel.app/>

- Built semantic resume-to-job matching with Sentence Transformers (all-MiniLM-L6-v2), requirement-aware analysis, and evidence retrieval to connect job requirements with relevant resume content.
- Developed a FastAPI backend and React/Vite frontend; containerized the application with Docker and deployed the backend to Google Cloud Run and frontend to Vercel.
- Validated application functionality with 7 passing automated tests.

Used Car Fair Price Analyzer | Regression and Explainable AI

GitHub: <https://github.com/tahirsaeedtech-stack/used-car-fair-price-analyzer> | Live demo: <https://used-car-fair-price-analyzer.vercel.app/>

- Built a CatBoost regression application using 61,000+ used-car listings, achieving R-squared (R2) of 0.859 and MAPE of 9.93% on an untouched test set.
- Added a validation-calibrated 90% estimated price range, seller-price comparison, and SHAP-based explanations to help users interpret predicted vehicle prices.

Telco Customer Churn Prediction | Classification

GitHub: <https://github.com/tahirsaeedtech-stack/Telco-churn-ML-application> | Live demo: <https://telco-churn-ml-application.vercel.app>

- Compared Logistic Regression, Random Forest, and Gradient Boosting using 5-fold cross-validation; Logistic Regression achieved the highest mean F1-score of 0.5987.
- Built scikit-learn preprocessing pipelines for missing-value imputation, scaling, and categorical encoding; serialized the complete pipeline with Joblib for consistent training and inference.

- Integrated a FastAPI REST API with a React frontend and containerized the application with Docker.

PROFESSIONAL EXPERIENCE

VIBRANT DYNAMICS | Remote

April 2018 - Present

Front-End Developer

- Delivered responsive dashboards, eCommerce interfaces, landing pages, and web applications for 20+ global clients, integrating REST and GraphQL APIs with back-end, product, and DevOps teams.
- Implemented user-centered UI/UX improvements that increased customer engagement by 25% and reduced bounce rates on key product pages.
- Improved page speed by 35% and strengthened Core Web Vitals through lazy loading, code splitting, and reusable component patterns.
- Adopted React.js, Tailwind CSS, and Git-based workflows that reduced development time by 22% and improved project delivery success by 35%.
- Mentored junior developers, led code reviews, and partnered across functions to improve clean-code standards and sprint delivery.

SSA SOFT SOLUTIONS | Lahore, Pakistan

October 2015 - March 2018

Front-End Developer | Full Time, On-Site

- Managed the front-end interface of 10+ web applications, delivering new designs, resolving defects, and supporting smooth integration.
- Completed 5+ WordPress projects with CSS animations and reliable compatibility across browsers and platforms.
- Provided UI design and bug-fix support across web portals and mobile experiences using React, JavaScript, HTML5, CSS3, Bootstrap, REST APIs, and Git.

EDUCATION & TECHNICAL TRAINING

Bachelor of Computer Science | University of South Asia, Lahore, Pakistan

2016

Java & Spring Framework Development | EVS Institute, Lahore, Pakistan
